Professional Summary

Recent graduate with strong background in artificial intelligence and machine learning. Hands-on experience gained through academic projects. Demonstrated ability to work effectively, solve complex problems and manage time efficiently. Eager to start a career, put my skills to good use and knowledge to make meaningful contribution with commitment and responsibility.

Education

B.Tech in Artificial Intelligence and Machine Learning, Reva University
CGPA: 8.8

Dec 2020 – Jun 2024
Bengaluru, India

TECHNICAL SKILLS

Data Analysis and BI: SQL(joins, aggregations, window functions), Data Cleaning, Data Transformation.

Business Intelligence: Power BI, Dashboards, KPIs, Slicers, Data Visualization .

Databases: Oracle SQL, DBMS .

Tools: Power BI Desktop, VS Code, Jupyter Notebook, GoogleSheets/Excel

Concepts: Data Analytics, Statistics, Machine Learning

Programming Languages: Python(Pandas, Numpy, Scikit-learn).

Projects

Customer Churn & Retention Analysis (Product Analytics)

- Analyzed customer churn patterns using SQL and python to identify high risk user segment based on tenure, contract type, and payment behavior.
- Quantified revenue impact of churn and highlighted high-value churn segments to support business prioritization.
- Prepared clean datasets and evaluation metrics to support downstream analytics and ML workflows.

Auditory Analysis | CNN | GTZAN DATASET | python.

- Advocated for the creation and implementation of a system for auditory analytics that uses Convolution Neural Network(CNN) and Music Information Retrieval(MIR)
- The goal was to use deep learning techniques to extract useful insights and patterns from audio data, improving decision-making and facilitating a deeper comprehension of auditory data.

Sales Performance Dashboard | SQL, MySQL, Power BI

- Built interactive Power BI dashboard.
- Performed data cleaning and wrote SQL queries for KPIs.
- Cleaned and transformed data including dates, currency values, and percentage fields.
- Analyzed discount VS profit impact to identify loss making products.

Certificates

- Python for Data Science, AI & Development By IBM 
- Mastering Data Analysis in Excel
